

“COLOR IT EASY” PAINT PROGRAM

You choose your color – any color in the rainbow and beyond – and Great Openings will paint your product exactly as you want. All products are finished with a hybrid powder formula (epoxy and polyester), which ensures an exceptionally durable, consistent finish. Simply select from our 55 Standard Colors, Industry Favorites (viewed online), or Custom Colors:

55 Standard Colors

Choose from 55 standard colors, all at standard lead times and price. All standard colors are “smooth”, except those identified as “textured”.

Industry Favorites (viewed online)

Visit www.greatopenings.com to find a comprehensive list of colors that are available for you to order just as though they were among our 55 Standard Colors.

- No added cost
- Standard lead-time
- No minimum order size
- Not necessary to exchange paint chip samples or to get your signed approval, as we already know we have a perfect match with the original manufacturer's color
- Simply send us your purchase order with the paint color name and number identified in this online list
- Great Openings will process your order, then send you an order acknowledgement
- Depending on paint cost and availability that is beyond our control, colors may be added or removed from this list of Industry Favorites

Custom Colors

When you need a color that's not included in our 55 Standard Colors or Industry Favorites, simply send us a paint chip and we'll get it matched. A special lead time or cost will likely be included, but we can almost certainly supply exactly the color you need

- No minimum order size on Custom Colors
- Custom Color up-charge is applied on a per unit basis
- Minimum lead-time is 15 working days after we receive your written color approval

Here's how it works for custom colors:

Step 1: Send us a 2" X 2" sample of your desired Custom Color (a metal chip is best, but often a laminate or paper sample will work).

Step 2: We'll work with our paint suppliers to find a match, a process that typically takes 5 to 10 business days. Then we'll send a metal sample of our recommended paint color back to you, along with a sign-off sheet, per unit up-charge, and lead-time requirements.

Step 3: You'll return the sign-off sheet along with your purchase order. We'll send you an order acknowledgement, and away we go!

Please note: Our objective is to order exactly the correct amount of paint for each order so that we can offer you the lowest possible price. For this reason, if you happen to order the same custom color again weeks, months, or years later, paint inventory will likely not exist and any additional costs will once again be charged per unit, no matter the order size.
