

Great Openings' Lockers: Now in Laminate

In addition to our industry-leading family of metal lockers, Great Openings now offers laminate lockers. The warmth and versatility of laminate construction is a great complement to all that GO offers. Laminate lockers are available in most of Great Openings' standard locker dimensions. Choose from a wide selection of Wilsonart and Formica wood grains and patterns, both TFL and HPL. With the relative ease of laminate customization, we also welcome special requests.

Door Pulls

Customize the aesthetic of your lockers with a selection of door pull styles.
