

1. Unpack the units and remove the shelves and the bottom as shown. Under the bottom there are 2 mounting holes on each side. There are also 2 mounting holes on the top on each side.

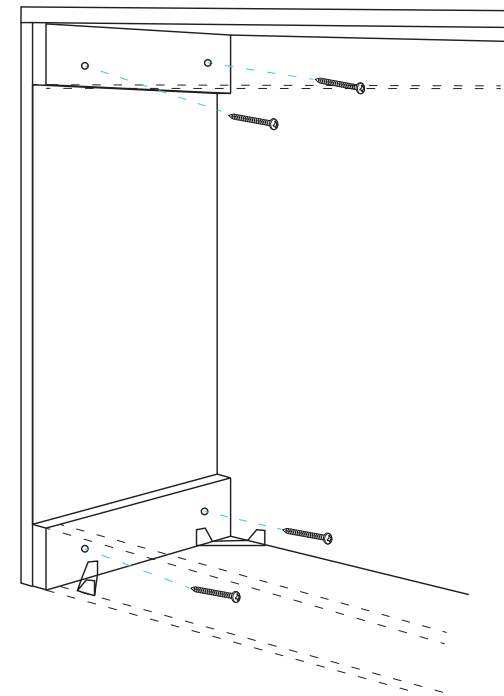

Insert the 2 plastic push in fasters to the back panel. Then slide the two units together and insert the 4 screws as shown in the pictures below.

Repeat this process for as many bookcases as you have. There is always a starter unit, adder unit and an ender.

After complete, level the unit as needed and then slide the bottoms in and attached the shelves with the pins provided. All hardware is provided.

Tool(s) needed:

#2 Phillips screwdriver

Hardware included:

(6) Phillips #10 x 1.75" round head screws

Plastic Push-in Fasteners
